02

POSITIONING

The EPAY Community is the **Community Growth Layer** of ENIPAY's global digital payment ecosystem.

- ✓ **ENI** is the underlying/Layer-1 public chain.
- ✓ **ENIPAY** is the AI + Web3 payment network.
- ✓ **EPAY** is the Community Growth Layer.

Core Statement:

ENI provides the underlying infrastructure,
ENIPAY provides the payment network,
EPAY drives user adoption, traffic,
usage, and ecosystem data growth.

Core Missions:

- Onboard real users to ENIPAY
- Expand global community nodes
- Drive real-world usage
- Collect on-chain data for future listings
- Build market trust

03

THREE-LAYER ARCHITECTURE

The ENIPAY ecosystem consists of a public blockchain, a payment network, and a community growth layer, forming a complete **value support system and closed loop**.

Layer 3

EPAY COMMUNITY GROWTH LAYER

User growth, community education, market expansion, ecosystem incentives, and on-chain data circulation.

Layer 2

ENIPAY PAYMENT NETWORK

AI Agent Payments, Stablecoin Settlement, Web3 Commerce, Global On-chain Payments.

Layer 1

ENI PUBLIC BLOCKCHAIN INFRASTRUCTURE

High-performance Layer-1, supporting on-chain settlement, secure transactions, stable cash flows, and Web3 commercial applications.

04

WHAT IS EPAY?

WHAT IS EPAY?

- ✓ EPAY is not a public chain.
- ✓ EPAY is not a single-U card project.
- ✓ EPAY is not a standalone payment company.
- ✓ EPAY is the **community growth entrance** of the ENIPAY ecosystem.

Its Core Missions:

-  Onboard real users to ENIPAY
-  Drive real-world usage
-  Build market trust
-  Expand global community nodes
-  Collect on-chain data for future listings

05

ENI CHAIN: UNDERLYING INFRASTRUCTURE

ENI is enterprise-grade modularization for large-scale commercial scenarios, featuring high performance, modularity, chain-agnostic design, and commercial-grade scalability.

ENI is the foundation. Without ENI, **ENIPAY** cannot achieve on-chain clearing and asset flow capability at the base layer.

06

ENIPAY: AI & Web3 Payment Infrastructure

ENIPAY's official positioning is:

A global digital payment network shared by humans and AI Agents.

ENIPAY is not a single card product, but a future-oriented payment infrastructure.

Core Focus Areas:

AI Agent Payments

Stablecoin Settlement

Web3 Commerce

Global On-chain Payments

Crypto / Fiat Payment Access

07

WHY NOT A U CARD PROJECT?

WHY NOT A U CARD PROJECT?

ENIPAY is not a U card;
it is one of the payment rails.

Cards are just one of the payment access methods in certain regions and under certain use cases.

ENIPAY's core value is to build a global payment network for the AI + Web3 era.

The card is a tool; the payment network is the core.

The rail is the base layer; the settlement network is what creates real value.

ENI Chain × ENIPAY Payment Network × EPAY Community Growth Layer

08

ENIPAY CORE CAPABILITY 1: AI AGENT PAYMENTS

In the future, AI Agents do more than just answer questions—they will execute tasks, make purchases, call APIs, and settle transactions.

ENIPAY SOLVES:

AI Agent payment identity

AI Agent authorization & permissions

AI Agent micropayments & settlements

Secure boundary between AI Agents and user accounts

The next-generation payment network serves not only people—but also AI Agents.

09

ENIPAY CORE CAPABILITY 2: Stablecoin Settlement

Stablecoins are becoming the **base settlement layer** of the global digital economy.

ENIPAY enables stablecoin settlement, bridging:

跨境支付

Cross-border Payments

链上清算

On-chain Settlement

商业交易

Merchant Payments

用户资产流通

Digital Asset Mobility

Web3 应用支付

Web3 Commerce

Stablecoins make global payments faster,
lower in cost, and settle in real time—24/7.

10 | ENIPAY CORE CAPABILITY 3: Web3 Commerce

Web3 Commerce is not about just selling tokens—it is about bringing on-chain assets into real-world consumption scenarios.

ENIPAY SUPPORTS:

Digital Asset Consumption

Supports on-chain asset consumption in real-world scenarios.

Merchant Collections

Merchants can accept encrypted assets and stablecoins.

On-chain Payments

Supports on-chain address payments, DApp internal payments, and subscription payments.

DApp Financial Access

Integrates with DeFi, GameFi, SocialFi and other financial application ecosystems.

Global Settlement Network

Supports on-chain settlement, B2B payments, and supply chain payments.

11

THE STRATEGIC ROLE OF EPAY COMMUNITY

THE STRATEGIC ROLE OF EPAY COMMUNITY

EPAY is the community growth engine of ENIPAY.

- 1 User Growth**
Onboard real users and expand the global community.
- 2 User Education**
Build understanding of ENI, ENIPAY, AI payments, and stablecoins.
- 3 Usage Activation**
Drive real usage and increase transaction frequency and depth.
- 4 Market Voice**
Amplify EPAY's voice through communities, content, livestreams, and offline events to boost brand influence.
- 5 On-chain Data Sink**
Generate on-chain data including user count, transaction volume, activity, retention rate, and core metrics.

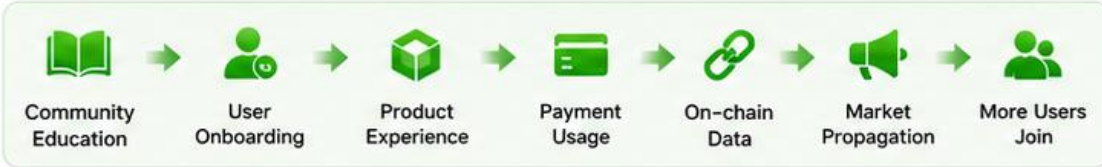

Listed data is not just numbers, it is the growth layer powered by the EPAY Community helping ENIPAY grow through data.

12

EPAY COMMUNITY GROWTH FLYWHEEL

EPAY COMMUNITY GROWTH FLYWHEEL

Community builds adoption.

Community-driven adoption expands the real user base.

Adoption builds data.

Real user behavior generates on-chain data and usage metrics.

Data builds value.

Data accumulation creates long-term value and a strong foundation for listing.

This is a sustainable, self-reinforcing flywheel that drives **EPAY** ecosystem expansion and continuously enhances value.

FIVE MAJOR MISSIONS OF EPAY COMMUNITY

FIVE MAJOR MISSIONS OF EPAY COMMUNITY

The five missions drive each other, jointly promoting EPAY ecosystem's real growth and long-term value.

01 User Onboarding

Onboard registered users, KYC users, and active users.

- Increase registered users
- Improve KYC completion rate
- Increase active user base
- Expand global community coverage

02 User Education

Enhance community understanding of ENI, EPAY, AI payments, and stablecoin payments.

- Deliver educational content and knowledge
- Create on-chain courses and educational materials
- Foster community discussions and knowledge sharing
- Enhance community awareness and comprehension

03 Traffic Generation

Drive traffic through communities, short videos, livestreams, and offline meetups.

- Operate communities and social media
- Distribute short-form video content
- Host livestreams and AMAs
- Organize offline meetups and roadshows

04 Usage Activation

Drive real usage of EPAY, not just new user sign-ups.

- Increase payment usage frequency
- Expand transaction volume and number
- Improve product feature usage rate
- Promote real-world consumption scenarios

05 On-chain Data

Accumulate user count, transaction volume, activity level, retention rate, and regional coverage.

- Accumulate core on-chain data
- Build on-chain data growth models
- Improve key performance metrics
- Meet on-chain data requirements for listing

What gets listed is not just numbers, it's **data**.

The EPAY community is the **growth layer** that empowers ENIPAY through **data**.

14

ECOSYSTEM GROWTH FUND POOL

ECOSYSTEM GROWTH FUND POOL

500M Ecosystem Growth Fund Pool

Five-phase fund allocation plan:

Phase 1		Initial Liquidity & Withdrawal Subsidy Pool Initial Liquidity & Withdrawal Subsidy Pool	20M USDT
Phase 2		Community Expansion Pool Community Expansion Pool	30M USDT
Phase 3		Payment Utility Growth Pool Payment Utility Growth Pool	50M USDT
Phase 4		Global Market & Compliance Expansion Pool Global Market & Compliance Expansion Pool	100M USDT
Phase 5		Pre-Listing Ecosystem Acceleration Pool Pre-Listing Ecosystem Acceleration Pool	300M USDT

Total Scale: **500M** USDT**Stability Foundation**

Ensure user security and build trust

**Expand the Community**

Expand global community and node construction

**Enable Utilities**

Promote real-world payment use cases and scenarios

**Go Global**

Comply with regulations and expand into international markets

**Drive the Listing**

Accelerate ecosystem value and pre-listing growth

Funds will be scientifically allocated across **community growth**, **real-world adoption**, and **data accumulation** to drive **ENIPAY** ecosystem's long-term and healthy development.

ENI Chain × ENIPAY Payment Network × EPAY Community Growth Layer

15

WITHDRAWAL SUBSIDY WALLET & ON-CHAIN TRANSPARENCY

WITHDRAWAL SUBSIDY WALLET & ON-CHAIN TRANSPARENCY

Withdrawal Subsidy Wallet

0x11F9CA5E8d42Ea77A7cD88def920937B1096d1a7

The wallet address is a part of on-chain transparency. Actual fund balance, transaction records, and release progress will be verifiable via a **blockchain explorer**, **Tx Hash**, **official announcements**, and subsequent audit reports.

On-chain Verifiability

All fund flows are 100% on-chain verifiable.

Real-time Transparency

Balance, transfers, and release records are updated in real time and publicly verifiable.

Data Reliability

All data on the blockchain is immutable and tamper-proof.

Public Release of Release Progress

Fund usage and release progress are publicly disclosed in phases.

Continuous Audits

Third-party audits and compliance reviews are conducted continuously.

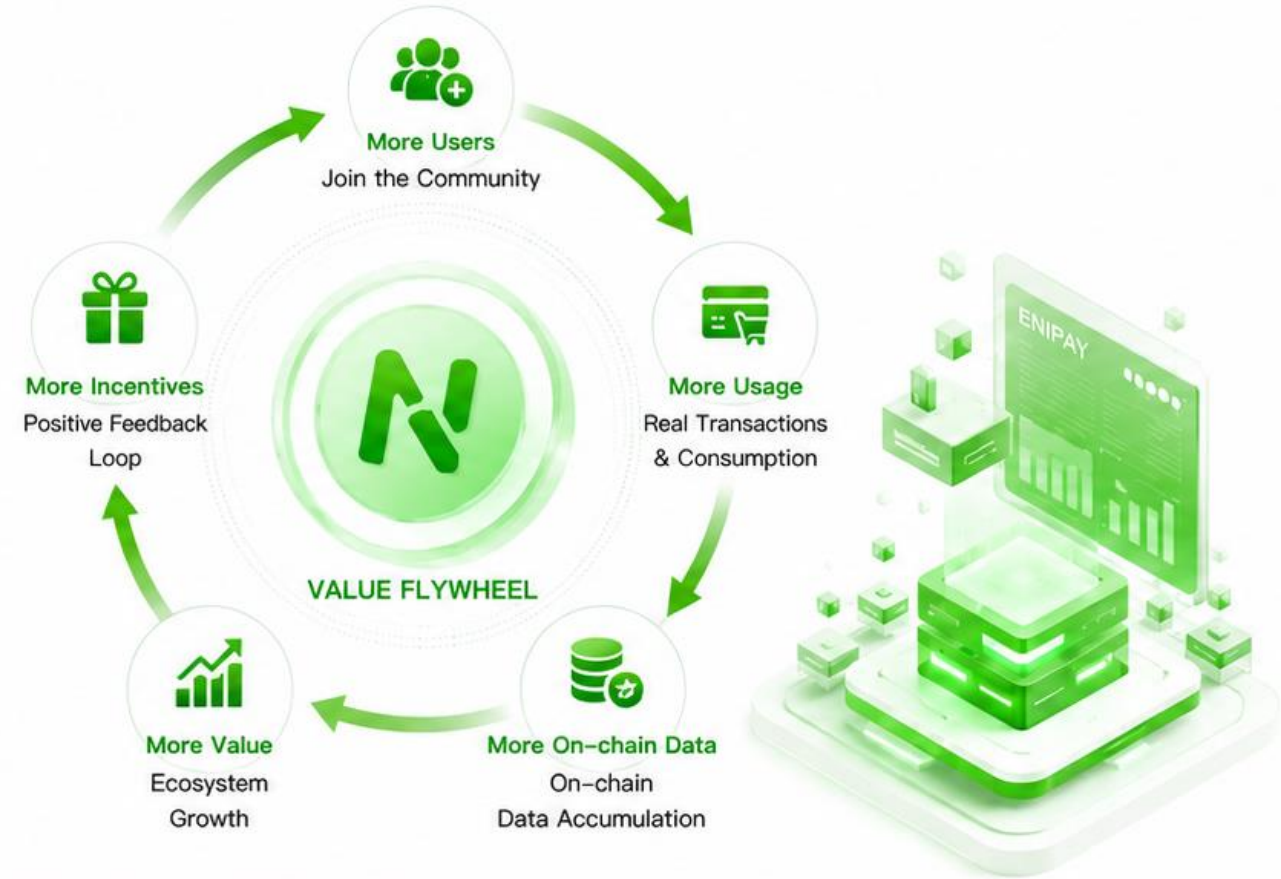

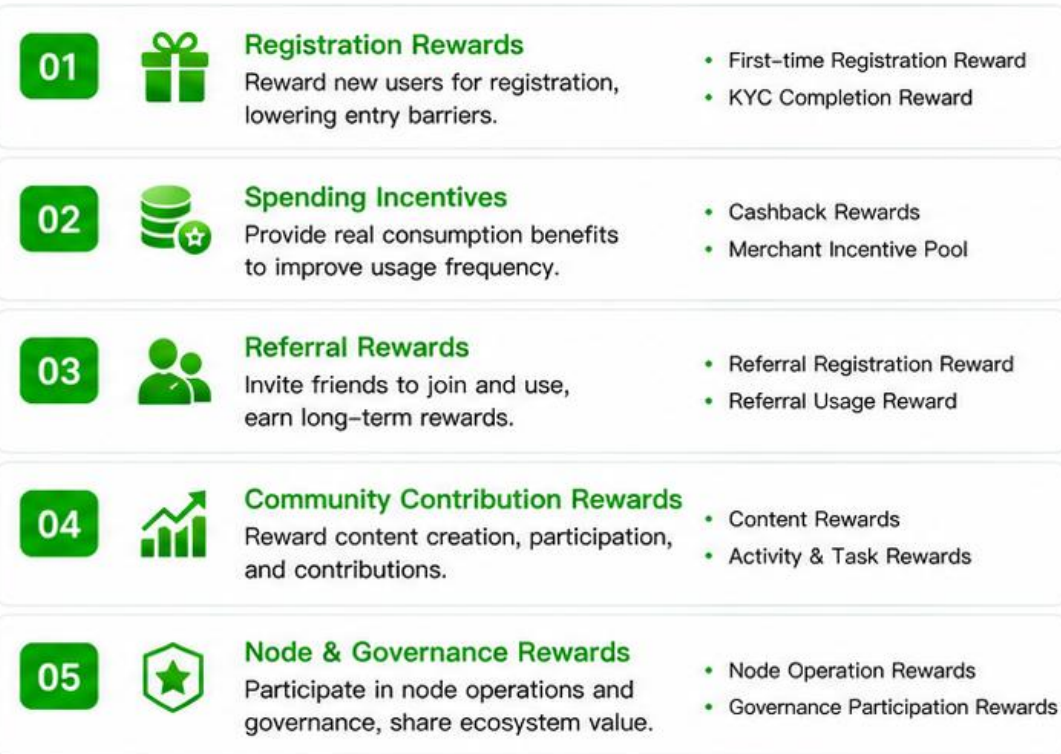

ENI Chain × EPAY Payment Network × EPAY Community Growth Layer

16

USAGE INCENTIVES & VALUE FLYWHEEL MODEL

USAGE INCENTIVES & VALUE FLYWHEEL MODEL

EPAY drives **real usage** through multiple incentive mechanisms, creating a **sustainable** virtuous cycle.

Incentivize Real Usage → Enable On-chain Data Accumulation → Expand Value Continuously → Drive Sustainable Ecosystem Growth
This is the core engine behind EPAY community's long-term sustainable growth.

17

EPAY TOKEN ECONOMICS

EPAY TOKEN ECONOMICS

The EPAY token is the **core of the community ecosystem**, designed to incentivize real contributions, drive a self-sustaining ecosystem, and achieve **long-term value growth**.

Through a fair and transparent distribution and communication mechanism, EPAY tokens will be **co-owned by the community**, forming a **long-term** valuable digital asset.

Core Use Cases

Community Incentives

Rewards for contributions such as content, referrals, and education

Payment & Usage

Used for payments of services and product usage

Governance Participation

Participate in community governance and ecosystem decisions

Value Capture

Ecosystem growth drives token value enhancement

Token Circulation & Value Capture Mechanism

Ecosystem Revenue

Platform revenue and partnerships

80% Buyback & Burn

Sustainable buyback and burn of EPAY tokens

Community Incentives

10% allocated to community rewards for long-term contribution

Private Sale

5% allocated to private investors to attract users

Treasury

5% allocated to treasury to support ecosystem development

ENI Chain × EPAY Payment Network × EPAY Community Growth Layer

EPAY establishes deep partnerships with global high-quality ecosystem builders, jointly driving the **global adoption and development of the ENIPAY ecosystem**.

CORE COLLABORATION AREAS

SELECT STRATEGIC PARTNERS (EXAMPLES)

VALUE BROUGHT BY PARTNERSHIPS

- 

Global Reach
Accelerate global ecosystem coverage
- 

Stronger Trust
Enhance user and institution trust
- 

Expanded Use Cases
Enable real-world payment and commercial scenarios
- 

Higher Liquidity & Efficiency
Increase capital efficiency and market liquidity
- 

Stronger Brand Impact
Build global brand influence and ecosystem synergy
- 

Accelerated Innovation
Jointly drive Web3 payment innovation

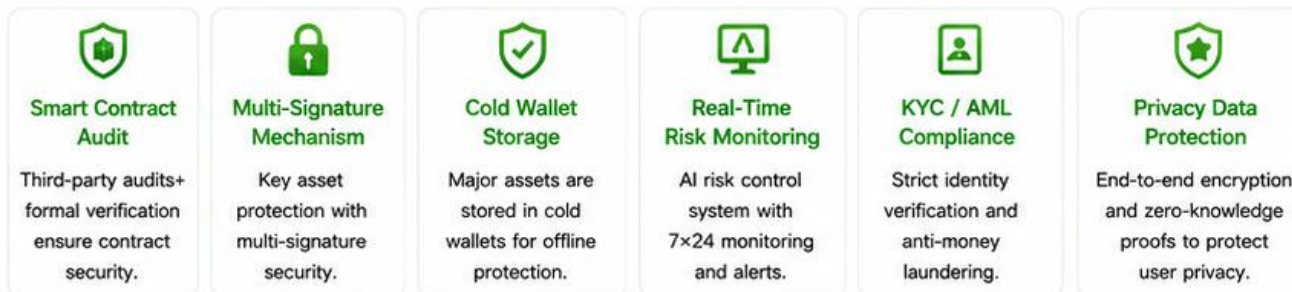

Through strategic collaboration with global ecosystem partners, EPAY will **accelerate, more securely and sustainably** achieve **global distribution** and ecosystem-wide prosperity.

Built on the **ENI Chain**, EPAY adopts enterprise-grade technology architecture and multi-layered security protection to ensure the stable operation of the ecosystem and the security of **user assets**.

TECHNOLOGY ARCHITECTURE ADVANTAGES

MULTI-LAYER SECURITY PROTECTION

Driven by technological innovation and grounded in security & compliance, EPAY builds a **reliable, stable, and scalable** global payment infrastructure for the Web3 ecosystem.

The EPAY community ecosystem advances **in stages**, driving large-scale user adoption and **long-term ecosystem value**.

Our mission: Through continuous execution and innovation, build the world's **most impactful Web3 payment community ecosystem**.

21

GLOBAL EXPANSION & LOCALIZATION STRATEGY

GLOBAL EXPANSION & LOCALIZATION STRATEGY

EPAY will be driven by “local operations + global vision”, enabling rapid ecosystem expansion and building a global Web3 payment community.

GLOBAL EXPANSION ROADMAP

CORE PRINCIPLES OF GLOBAL EXPANSION

LOCALIZATION STRATEGY

We believe: through deep globalization and localization, EPAY will **connect the world, enable the free flow of value,** and let the benefits of the ecosystem reach every individual globally.

22

FUTURE VISION & VALUE IMPACT

FUTURE VISION & VALUE IMPACT

The long-term vision of EPAY is to build the **world's leading Web3 payment community ecosystem**. By connecting value between users and value, we drive **openness, fairness, and sustainability**, building a more **open, equitable, and sustainable** digital economy.

CORE VALUE IMPACT

User Value

- Access efficient payment services
- Enjoy lower fees
- Participate in the growth of the global Web3 economy
- Achieve personal value growth

Ecosystem Value

- Drive real adoption
- Improve transaction efficiency
- Build robust infrastructure
- Create a healthy and thriving ecosystem

Commercial Value

- Expand global market share
- Increase user scale and activity
- Enhance payment liquidity and efficiency
- Strengthen partner network

Industry Value

- Promote financial inclusion
- Support Web3 innovation and entrepreneurship
- Accelerate digital economy development
- Contribute to industry progress

Long-Term Value

- Build a sustainable ecosystem
- Create long-term value for users and the community
- Achieve decentralized autonomy
- Lead the future of Web3 payments

VISION

Empower every community member around the world to **co-create value, share value, and connect the world** within the EPAY ecosystem.

FUTURE MILESTONES (2024 - 2030+)

“ We are not just building a payment ecosystem, we are building a **value network** that connects the world and **creates the future**. ”

ENI Chain × EPAY Payment Network × EPAY Community Growth Layer
